Saad Sheikh

Senior Software Engineer | Full-Stack & React Native

+92-3330231707 saadsheikh27@gmail.com linkedin.com/in/saad-sheikh27 github.com/saad277

SUMMARY

Senior software engineer with 6+ years of experience building scalable web, mobile and desktop applications. Deep expertise in React Native for cross-platform iOS and Android apps, alongside React, Next.js, Vue.js and TypeScript, plus back-end experience in Django, Node.js and PostgreSQL. Leads front-end architecture, integrates third-party platforms such as Salesforce and PandaDoc, and owns deployments from staging to production. Mentors junior developers and focuses on performance, scalability and user experience.

TECHNICAL SKILLS

Languages	TypeScript, Python
Front-end	React.js, Next.js, Vue.js, Electron.js
Mobile & desktop	React Native (iOS & Android, 5+ years), Android Studio (Gradle), Xcode, App Store and Google Play releases
Back-end & data	Django, Node.js, PostgreSQL, Supabase, AWS
Web3	Ethers.js, smart contract integration and wallet integration
Integrations	Salesforce, PandaDoc, payment gateways, CRM and communication APIs
DevOps & tooling	Git, CI/CD (Bitrise), deployments and release management
Practices	System and component architecture, state management, performance optimization, accessibility, code review and mentoring

EXPERIENCE

BerTech LLC

Virginia, USA · Remote

Lead Software Engineer

Feb 2025 – Present

- Lead full-stack development of responsive, high-performance web applications, translating complex product requirements into intuitive interfaces and reliable back-end services.
- Architect scalable front-end solutions with reusable components, performance tuning and accessibility across devices.
- Build and maintain back-end services and REST APIs in Django, with PostgreSQL schema design, queries and data migrations.
- Integrate Salesforce to sync leads, accounts and customer data between the platform and the client's CRM.
- Integrate PandaDoc to automate document generation, e-signatures and contract workflows.
- Own deployments and release management, taking features from development through staging to production.
- Mentor junior developers, run code reviews and define the team's best practices and technical standards.
- Work with designers, product managers and stakeholders to ship features that meet business and customer goals.

USDFI

Remote

Software Engineer (Web3)

Jan 2024 – Dec 2024

- Integrated smart contracts into the web app front end using ethers.js, connecting UI actions to on-chain contract reads and transactions.
- Built wallet integration for connecting user wallets, signing transactions and keeping account and network state in sync with the UI.
- Handled transaction states, confirmations and error cases so users got clear feedback on every on-chain action.

BTL Labs

Remote

Senior Software Engineer

Sep 2023 – Feb 2025

- Built and maintained applications across web, mobile and desktop using Next.js, React Native and Electron.js.

- Turned complex requirements into pixel-perfect interfaces backed by reusable components, efficient state management and API integrations.
- Shaped product and UX/UI decisions with the founding team, and set practices for code structure, testing and deployment.
- Handled rapid prototyping, production debugging and tight-deadline feature delivery in a lean startup without compromising quality.

SwiftSales
Hybrid

Senior Software Engineer (Part-time) — Oct 2023 – Feb 2024

- Built and maintained the React Native app that lets sales teams manage customer conversations, track leads and give real-time support on iOS and Android.
- Implemented live chat, AI-powered bots, push notifications and lead tracking.
- Integrated third-party APIs including payment gateways, CRMs and communication tools, keeping the app at feature parity with the web platform.

Airlift Technologies
Karachi · Hybrid

Software Engineer — Nov 2021 – Jan 2022

- Built the rider portal web application in React, used to manage riders for Airlift's delivery operations.
- Developed reusable UI components and integrated back-end APIs for the portal's core workflows.

Koder Labs
Karachi

Senior Software Engineer — Feb 2023 – Sep 2023

- Set up base architectures for web and mobile apps built on Next.js and React Native.
- Managed front-end projects across web and mobile, gathering technical requirements directly from clients.
- Trained and mentored junior developers in front-end JavaScript and ran regular code reviews.
- Worked with project managers, QA and customers to diagnose and resolve technical issues.

Software Engineer — Apr 2021 – Feb 2023

- Built reusable components and stable API integration layers using middleware across web and mobile apps.
- Owned state management, routing, UX improvements and workflow optimization.
- Managed mobile builds in Android Studio (Gradle) and Xcode, and set up a Bitrise CI/CD pipeline for React Native Android apps.

Associate Software Engineer — Nov 2020 – Mar 2021

- Developed a large e-commerce admin portal with admin and vendor roles for managing product listings.
- Built a home services platform with a web portal and companion mobile app in React and React Native.

PROJECTS

MOBILE APPS · APP STORE

- **KeyView AI**
- **SnuggleScript**
- **Homebrew Coffee**

WEB PLATFORMS

- **BuoyHub**: all-in-one IT support, HR/payroll and CRM platform
- **FICATC**
- **LedgerSign**
- **Nature Cafe**
- **Homebrew**

EDUCATION

B.S. Software Engineering, Sir Syed University — 2017 – 2020

H.S.C. Pre-Engineering, Govt. College for Men

S.S.C. Science, Bahria Foundation School

LANGUAGES

English, Urdu

ACCOMPLISHMENTS

- Author, Hands-on TypeScript with React Native (Medium)
- HackerRank React (Basic) Certification
